Background and Purpose

The regulations in 33 CFR part 126 prescribing requirements for designated waterfront facilities that handle, store, and transfer hazardous materials to and from vessels were written in the 1950s and have never been significantly updated. On October 29, 1998 (63 FR 57964), we published a NPRM proposing to amend part 126 by updating the requirements to meet current industry standards for containerized hazardous material

cargoes. The closing date for the original comment period was scheduled for December 28, 1998.

During the original NPRM comment period we received several comments requesting an extension of the comment period. One comment from an industry group potentially affected by these regulations stated that it is meeting in mid-December and needs more time to develop comments. Another comment indicated difficulty meeting the December 28, 1998 deadline because the shipping industry is typically very busy during the holiday season. We accept these as reasonable requests and we are reopening the NPRM comment period by 60 days. The new NPRM comment period will close March 1, 1999.
